*Fall of 2011 Dosage information changed for Infants' Acetaminophen Concentration **Infants Concentrated drops (80mg/0.8mL) are 3x more concentrated than Acetaminophen Children's Oral Suspension! Be sure you are using the new 160 mg formulation!** Never give adult medicines to children! Keep a record of how much medicine you give and when it's given. Never increase the dosage because your child seems sicker. Always use the measuring device that comes with the medicine, do not use household teaspoons.

NO MOTRIN UNDER 6 MOS OF AGE

Poison Control Center 800-222-1222
